
• AP Environmental Science

AP Environmental Science

- Explore each section of the course and exam description, including the unit guides, while making connections to the course curricular requirements
- Begin to develop a course plan by unit and topic that incorporates the full scope of your AP course into your school's academic calendar
- Examine formative and summative assessment items to identify content and skill pairings that are the targets of these assessments and create lesson plans to reinforce content and skill connections
- Practice applying the scoring guidelines from the most recent AP Exam to samples of student work
- Identify student strengths and weaknesses using data available through AP Classroom and Instructional Planning Reports
- Explore ready-to-use strategies, instructional materials, and pedagogical tools pertinent to the content and skills required for success in your AP course
- Develop meaningful connections within the AP community

Bryan Beck

I have been doing Consulting for College Board for about 5 years now, and I truly enjoy teaching teachers and showing them how to do better for themselves and their students on the AP tests. I am a native Tennessean who now lives outside of Dallas, Texas with my wife and 10 year old puppy. We are trying to live a minimalist lifestyle and show the rest of the world how we could all get a little more out of life by asking less of the planet and each other.
